Adquira um MBA em inglês na Doshisha Business School no Japão para sua futura carreira profissional!

Por que Doshisha Global MBA?

O MBA (Master of Business Administration) é um "passaporte" para profissionais de negócios globais. A **Doshisha Business School (DBS)**, localizada em Kyoto, uma cidade bela e histórica no Japão, oferece um programa de **MBA de dois (2) anos em inglês**. Além disso, a DBS oferece um excelente ambiente de aprendizado para você.

Alunos e professores globalmente diversificados

Junte-se a uma turma diversificada de **estudantes de todo o mundo, vindos de mais de 85 países**. Recebemos alunos aspirantes e inspiradores independentemente de gênero, etnia, religião ou nacionalidade. Este ambiente lhe dá um conhecimento empresarial único e prático. Os membros do corpo docente também têm diversas nacionalidades. Não apenas japoneses, mas professores dos EUA, China, Índia e Áustria estão esperando sua participação ativa nas aulas.

Voltando-se ao Japão - um ambiente misto único do Oriente e do Ocidente

Na DBS, você aprenderá disciplinas essenciais para negócios, como Gestão Estratégica, Marketing, Finanças, Contabilidade, Gestão de Operações, Economia etc. Além disso, a DBS oferece diversas disciplinas aplicadas com base em três focos: (1) **Sustentabilidade e Negócios Verdes**, (2) **Negócios na Ásia**, e (3) **Cultura e Criatividade**, sob o conceito fundamental da "educação da consciência" do fundador da Doshisha University, Jo Neesima. Em outras palavras, a educação da Business School nascida no Ocidente é organizada incluindo o conceito cultural e ético do Japão, assim como o Oriente encontra o Ocidente.

Desempenho de alto custo para obter um MBA

Embora a DBS ofereça uma educação empresarial de qualidade, o nível de matrícula está na média do Japão, não no padrão global.

Valor total das mensalidades por 2 anos
(matrícula em 2023): **1.648.000 JPY**

Além disso, estudantes não japoneses podem usufruir de vários tipos de bolsas, oferecidas pelo governo e pela universidade. Verifique os detalhes no site da DBS.

Oportunidades de trabalho e conselhos de carreira

Enquanto muitos graduados tendem a voltar para seus países de origem em busca de carreiras superiores, também há muitos graduados não-japoneses que pretendem trabalhar no Japão após a formatura. O consultor de empregos da DBS pode ajudar na sua carreira. Existem muitos ex-alunos que mostram excelência em negócios obtidos por meio da DBS.

Ambiente da DBS

Instalações

A DBS está localizada no Edifício Kambaikan da Universidade Doshisha, Campus Imadegawa. Suas excelentes instalações incluem salas de aula presenciais, salas de projeto, salas para conversas casuais e a Biblioteca da DBS, abertas 24 horas por dia, todos os dias da semana.

A New Public (Prefectural) University Established in Hiroshima in 2021

Department of Social System Design / Social System Design Course

Hello, Future!

EIKEI Univ.

広島県公立大学法人
Hiroshima Corporation for Higher Education

Bachelor's degree offered in English! -Japanese proficiency is not required-

Eikei University of Hiroshima

A New Public University Opened in April 2021

Eikei University of Hiroshima aims to foster a cadre of young people who have a high aspiration to tenaciously pave the way for the 22nd Century.

Why Eikei University -6 points-

1. Bachelor's degree offered in English

EUH offers undergraduate courses in English, with opportunities to learn the Japanese language for international students.

2. Studying in Hiroshima, Japan

Our campus is located in the central district of Hiroshima City, a historical city of Peace and Culture, One of the main cities in the western part of Japan.

3. Economically attractive

All international students are privileged to receive a special scholarship of 50,000 yen per month (for 4 years). Entrance fees and tuition can be paid with this scholarship.

4. "On-campus" dormitory

Our 15-story campus building will have an "On-campus" international dormitory on its upper levels.

5. On/off Campus Learning

EUH offers learning opportunities both on- and off-campus. On-campus learning includes active learning classes, while off-campus learning is conducted through Project-Based Learning (PBL) and experiential/practical programs such as studying abroad programs, internships, and volunteer activities.

6. SDGs-oriented Liberal Arts Undergraduate version of MBA

The SDG's 5Ps (Peace, Partnership, People, Prosperity, and Planet) are designed as the pillars for learning. The main academic fields include Humanities, Economics, and Natural Science (Environmental Studies).

◆0-minute walk to international student dormitory

◆ 9-13th floors of the campus are dormitories, with the capacity to house approx.100students.

15-story campus building

The field is limitless! My ideal career design

Dreams of EUH students and their career paths expected from their practical programs

My Dreams

I am interested in ICT. I would like to promote digitalization and economic development in developing countries. In particular, one of my goals is to act as a bridge between Africa and Japan through this kind of business.

Activities

Without a healthy natural environment, economic development cannot be expected. Therefore, I would like to find out through studying business and environmental design how we can create innovations that can develop the economy while prioritizing the maintenance of ecosystems and biological diversity.

Possible career paths

- IT Infrastructure Industries
- Environmental business
- International Non-Governmental Organizations

DDEMBE Francis, sophomore
(From Uganda)

My Dreams

I would like to start my own business to strengthen Vietnam's economy and bring many people out of poverty. First, I would like to build a career at a foreign staffing company, and after learning the "how-to", I would like to start my own company that can provide education and employment for the Vietnamese.

Activities

I am going to I-Shou University in Taiwan for a 10-month exchange program, starting in the summer of 2022, to study international business and the Chinese language. I believe that Chinese is important for setting up an international staffing company. I would also like to gain a deeper understanding of business. I am confident that after studying abroad, I will have a clearer vision of my future.

Possible career paths

- Foreign-investment enterprises
- International organizations
- Entrepreneur

NGUYEN THI MY Hanh, sophomore
(From Vietnam)

My Dreams

I would like to create a system to reuse one-time-use plastic products. In addition, I would like to make an application that allows users to check and compare the carbon dioxide emissions of each forestry and agricultural machine. I am planning to work with some companies that are addressing environmental issues.

Activities

Protecting the natural environment is a pressing task we now have. I have been actively discussing this issue with other students who are also interested in this and coming up with some creative ideas as to how we can better protect the natural environment. Choosing the advanced course of Ecosystem Design, I would like to increase my knowledge of these issues and acquire the necessary skills.

Possible career paths

- Environment-related NGO
- Environmentally friendly companies
- Software development

OGAWA Jonathan Kaisei, sophomore
(from Japan)

GLOBIS University
Japan's No. 1 MBA

The International College of Liberal Arts (iCLA) at Yamanashi Gakuin University is a four-year, American style liberal arts college where the primary language of instruction is English. Students can choose from a wide array of courses in various disciplines, with the innovative and practical curriculum leading to a bachelor's degree in International Liberal Arts.

Located just 90 minutes west of Tokyo, in Kofu City, Yamanashi, iCLA combines a truly multi-cultural learning environment with a beautifully traditional Japanese setting in the shadow of Mt Fuji.

Curriculum

As part of iCLA's Bachelor of International Liberal Arts, students can declare one of the following five majors:

- **Global Business & Economics**
- **Political Science**
- **Interdisciplinary Arts**
- **Japan Studies**
- **Psychology**

Why choose iCLA?

- Truly multi-cultural learning environment in a beautiful Japanese setting
- Broad liberal arts curriculum with many electives and workshops to choose from
- Small class sizes that increase student and faculty communication and collaboration
- Positive and Active learning environment that builds critical thinking and teamwork skills

Tuition and Other Fees (Prices in JPY)

Tuition and Other Fees	First Year	Second Year and Onwards

Multicultural Communities

IU acknowledges that diversity is an important component of our students' education. Through Campus life with different nationalities and different backgrounds, you can learn from each other, world views and gain awareness of critical issues while learning to work together. A borderless and independent environment is created on the campus.

School	GSIR Graduate School of International Relations				GSIR/GSIM		GSIM Graduate School of International Management		AACSB
Program	International Relations (IRP)	International Development (IDP)	Public Management and Policy Analysis (PMPP)	International Public Policy Program (IPPP)	Japan-Global Development (JGDP)	MBA	Intensive MBA (IMBA)	Digital Transformation Program (DXP)	
Degree	-MA in International Relations (IR) -MA in Political Science (PS)	-MA in International Development (ID) -MA in Economics (ECO)	-MA in Public Management (PM) -MA in Public Policy (PP)	-Master of International Public Policy	-MA in International Relations -MA in Economics -MA in International Development -Master of Business Administration	-Master of Business Administration	-Master of Business Administration	-Master of Digital Management	
Short Introduction	By taking the basic courses for the IR degree, students acquire the basic concepts and theories of international relations, empirical knowledge, and analytical skills. In the PS program, students study topics such as comparative politics, political institutions, political theory and methodology, with a strong focus on methodology. They thereby acquire sufficient methodological skills to analyze diverse issues in political science.	Throughout the coursework, the ID track students learn how to evaluate current policies and design more effective policies to encourage economic growth and social development for developing countries. The ECO track students learn applied macroeconomics comprising fiscal policy and international finance as well as empirical microeconomics including labor, health, and environmental issues.	The PMPP provides students with knowledge and skills that are necessary to be good managers in public and non-profit organizations. The PM additionally requires Managing Public Organizations, Public Administration, and Public Finance and Budgeting to learn better ways to improve public service delivery, while students in the PP track must take Cost Benefit Analysis, Introduction to Policy Modeling, and Policy Evaluation to understand policy making and implementation.	IPPP is a one-year midcareer program designed for diplomats and government officials of countries around the world. It was created as part of the collaboration framework between IUJ and the Japan International Cooperation Agency (JICA). This is a highly interdisciplinary program with special emphasis on international affairs and policy analysis. Students will acquire a broad range of academic knowledge on social sciences, while learning to have broad, historical perspectives to look at and analyze the contemporary world.	The JGDP is a two-year master's program offered jointly by the GSIR and GSIM to provide students the opportunity to learn universal development and growth logic in the fields of politics, economy, and management, using Japan's experiences in economic development and corporate growth as basic case materials. The logic and lessons from Japan's experience, both successes and failures, from the 19th Century to date will help future leaders from abroad when they have to think about their strategy for development back home.	As the first US-style business school in Japan, IUJ's MBA program has bridged management thinking between international and Japanese business communities. As a result, the program has earned many recognitions from outside accreditors like the Economist's "Best Business Schools" and AACSB International.	The COVID pandemic and rapid digitalization of business processes are inducing a paradigm shift in the way we conduct business. Corporations are placing increasing emphasis on environmental, social, and governance (ESG) issues. The post-COVID-19 business environment requires managers to be cognizant of ESG issues and integrate them in business performance. IUJ's IMBA program prepares future leaders to meet these new challenges.	DXP trains future managers and entrepreneurs with particular strengths in the DX domain. This program does not aim to train students to become IT specialists in any specialized subfields. We expect students to master the fundamental and long-lasting IT knowledge and principles. A degree in this program will certify you to be a professional who is equipped with essential panopoly for DX.

3 Clusters >>>

Economics Cluster Public Management Cluster International Relations Cluster

The PhD program, according to specialized research areas, consists of 3 clusters that are formulated by further developing the 3 existing Master's programs in GISR, i.e., "International Development Program," "Public Management and Policy Analysis Program" and "International Relations Program."

Summer Intensive English Program (IEP)

IUJ's Intensive English Program (IEP) is an eight-week program, offered from mid-July to mid-September before entrance to the all program. The IEP provides 23 hours of classes (focusing on academic writing, reading, listening/note-taking and oral presentation/discussion skills), and requires about 30 hours of homework per week.

Graduate School of Information Technology Kobe Institute of Computing

Initiatives to address Africa's Social Innovation

15TH

JICA President Award Commendation
KIC contributed significantly to developing human resources and social development through international cooperation by ICT.

Diversity KIC

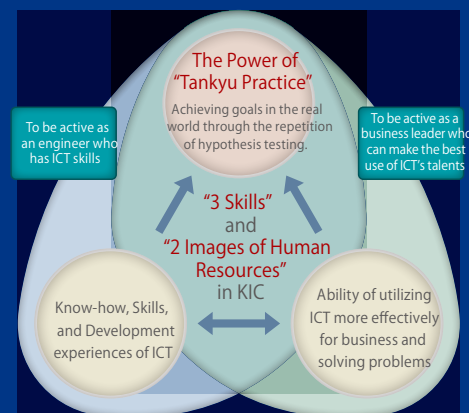

The social problems of the day tend to be more and more complicated. Knowledge from experience and Knowledge of basic are not enough to respond to issues today. We are living a time when from manager to new employees are required to gain advanced knowledge and sharpen own skill to march the new business opportunities. So far, many personal from various parts of the world have completed the Innovator course at Kobe Institute of Computing and found valuable opportunities with the new skills they acquired. Won't you join then and broaden your knowledge in the ICT sector and consequently gain higher value as a human resource. KIC's diverse environment is the place where you can achieve ambitions and reach targets. The language of instruction and guidance of the Innovator course at KIC is English, but you will have the opportunity to use others while chatting with our students from various countries and areas.

Social innovation by ICT and Yourself

About KIC

KIC Strength

KIC graduates are professional human resources in the field of ICT, and they are ready to support their societies.

The curriculum adopted at KIC is designed to enhance the practical skills and develop the capacity of problem solving. It allows students to pick their research topics based on their hopes to contribute to society. The students' backgrounds are diverse and include humanitarian, science, and even IT engineers. All students are expected to master technology during two years master course.

The curriculum consists of fundamental, applied, and advanced subjects. KIC graduates can contribute in various contexts such as software development, telecom networks, embedded software, system architecture, and project management.

Image of Human Resources and Activity Fields

ICT field

Teachers with experience in technology, business, social development, and management prepare and deliver lectures starting from the foundation stage. You will learn the principle of computer and application operation through OSS innovative teaching materials, and then try to solve problems through practical projects.

Business and Social Development field

We train the human resources to be able to decide what things are necessary for a specific solution to social problems and for providing new services through utilizing ICT.

Research Topics of SDGs (Excerpt)

Collaboration with private companies

Contribution to the business exchange between Africa and Japan

KIC and Otowa Electronic exchanged MOU for business expansion and industrial human resource development for African countries. Many African countries are suffering from lightning damage in their society. Rwanda, for example, is the most affected country around the world by lightning. KIC accepted many students from Rwanda, and some of them participated in an internship program in Otowa Electronic. Mr. Amiri Mugarura was one of such students, and he was impressed by their high technology. He wished Otowa Electronic to support Rwanda technically and business expansion. His strong passion made

Otowa Electronics decide to support human resource development for restoration from lightning damage. The company is currently expanding business in Rwanda. A partnership agreement (MOU) between KIC and Otowa Electronics has become real thanks to encountering Rwandan student wishing to decline lightning damage. Mr. Amiri has established his own ICT company and want to tack Rwanda's development challenges in collaboration with Otowa Electronic.

Problem solving, private partnership, own and unique program

KIC fosters students having flexible thinking through various curriculum and private companies' observation. KIC's original lecture, "Practice of Creativity Development", is conducted by the President of KIC, Prof. Sumitani, in order to train students having flexible thinking and creativity required for problem finding and solution proposing. Students can learn various methods of idea creation by active learning style. During 15 times lectures, valuable guest lecturers from various fields of private sectors will be invited and the lecture will be conducted by omnibus form. "Leadership Innovation Program" for young staff training conducted by Chugai Pharmaceutical Co., Ltd. in Tokyo is one of the examples. KIC students from abroad and young staffs of Chugai-Seiyaku jointly discussed about challenges of students own countries such as Malaria, HIV/AIDS,

energy supply, preventing glucosuria and others. They suffered to create innovation to solve the issues, but proposed possible new solution through KIC's own Tankyu method for problem solving. KIC is connecting various partners such as private companies, institutions and individuals to provide opportunities to find solution both for Africa and Japan interactively.

Activities of the graduates

MAKONO, Esta Jackson
Tanzania / completed in 2017

She found employment at G.E.S. in Osaka that received her as an intern during her study in KIC. CAD designing for environmental facilities is her task in the company and preparing a new project for water and housing in Africa together with learning the latest advanced technologies to solve environmental issues in the atmosphere, water, and soil.

MUGARURA Amiri
Rwanda / completed in 2016

He established his own ICT Company, DATA EK, after returning to Rwanda. He works together with Otowa Electronics that received him as an intern to solve lightning damage in Rwanda under JICA's partner-ship project.

KIC's Vision for SDGs

SDG's vision of KIC

1. Foster people to solve social issues by ICT and human skill
2. Creation of sustainable future society harmonizing human and technology
3. Realization of Society 5.0 of Japanese government and SDG's of the international community by all efforts

Tuition fee	Undergraduate: 998,300~1,076,300JPY (\$7,131~7,688) /year Graduate: 729,000~730,000JPY (\$5,207~5,214) /year	
Accommodation rent	[On campus] Student dormitory: -50,000JPY (\$360)~/month [Off Campus] Private accommodation: 70,000JPY (\$500)~/month	
Living costs (food, clothing, transportation etc.)	about 45,000JPY (\$320)/month	

Scholarship Program and Tuition Waiver

- (1) Kokugakuin University International Student Scholarship
200,000JPY (\$1,428)/year(Undergraduate)
- (2) Other Program
300,000JPY (\$2,142)/year(Undergraduate)

Tuition Waiver	30% (Undergraduate/Graduate)
----------------	------------------------------

Kokugakuin offers tuition-deduction program to international students both in undergraduate and graduate programs. The deduction ratio is 30% as of April 2023. The applications for this program are reviewed based on the financial condition and credits earned in the previous year.

There are more than 200 student clubs. The focus of the activity varies from Japanese traditional art such as tea ceremony to various kinds of sports of different skill levels.

World-Famous location

Our main campus is located in Shibuya, Tokyo, the origin of world-famous Japanese pop culture.

The collections of regular exhibitions of Kokugakuin University Museum are divided into three categories; Shinto Study, Archaeology, and the History of Kokugakuin. Besides, special exhibitions with the theme of Japanese culture and society are held periodically.

④ Tuition Waiver

You may be eligible to get **all or half of your tuition fees waived**, if your application is accepted.
(Roughly 60% of the undergraduates, 80% of the master's course students, and 90% of the doctoral course students are exempted.)

Major Strengths of Kyoto University

Founded in June 1897, Kyoto University has a long history and enduring traditions. The main campus is located in the historic city of Kyoto, a center of traditional Japanese culture. Since its founding, the University has been dedicated to furthering higher education and fostering an atmosphere of academic freedom. Graduates of the University play important roles in both inside and outside of Japan, as key players in politics, industry, and society.

Cutting-Edge Research Hub

Kyoto University is one of the world's foremost research institutions, attracting outstanding researchers and students in diverse disciplines from all over the world. By providing state-of-the-art facilities and a rich, stimulating academic environment, Kyoto University enables its researchers to fully develop and grow as scholars, and supports the development of innovative cutting-edge research projects. Academic freedom that the University has fostered brought many awards recipients including recipients of the Fields Medal, Gauss Prize, Lasker Award, and 11 Nobel laureates. You can study in this rich academic research environment.

World-Class Education Programs

Kyoto University offers a diverse range of exceptional education programs designed to guide students towards realizing their full potential. Students benefit from the university's rich academic environment, expert guidance, and a diverse range of experiences that only Kyoto University can provide. In addition, through various extracurricular activities students will be able to develop the ability to take active action, and through such experiences, they will develop the ability to play a leading role that will be appreciated by the world in the future.

Undergraduate Faculties

Kyoto University offers bachelor programs in a wide range of study areas among 10 undergraduate faculties. The academic year begins in April. Students must have sufficient proficiency in Japanese, as classes are generally taught in Japanese*.

To enroll in these programs, international applicants need to go through the same selection process as domestic applicants in principle. The Faculties of Pharmaceutical Sciences and Engineering also have a special selection for privately-financed international applicants. In addition, the Faculties of Law and Economics have a special selection for graduates from schools located in countries other than Japan.

Faculties

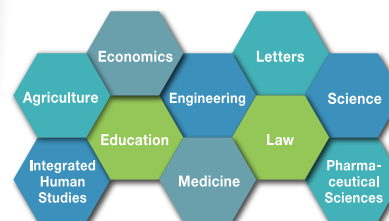

<https://u.kyoto-u.jp/faculties>

How to Apply (Faculty)

<https://u.kyoto-u.jp/how-to-apply>

*The Faculty of Engineering offers an English-taught program in the Undergraduate School of Global Engineering. Details can be found on the next page.

Graduate Schools

Kyoto University offers a wide range of study areas among 18 graduate schools, of which 10 offer programs which can be completed entirely in English. The academic year begins in April or October. The basic language of education is Japanese*, though supervision may be offered in English depending on the laboratory/faculty member. Application requirements and procedures vary depending on the graduate school/program.

Please refer to the website of each graduate school for details. For any questions, please contact the relevant administration office.

Graduate Schools

<https://u.kyoto-u.jp/graduateschools>

*There are also programs which can be completed entirely in English. For information on those programs, please check the following page.

Scholarships

There are several types of scholarships available for international students, including the Japanese Government (MEXT) Scholarship. For more information about scholarships, please visit the website below.

Scholarships <https://www.kyoto-u.ac.jp/en/education-campus/procedures/scholarships>

Tuition and Fees (As of April 2023)

Student Categories	Exam Fee	Admission Fee	Tuition*2
Undergraduate Students	17,000 JPY	282,000 JPY	535,800 JPY per year
Graduate Students	30,000 JPY*1	282,000 JPY	535,800 JPY per year
Law School Students	30,000 JPY	282,000 JPY	804,000 JPY per year
Research Students	9,800 JPY	84,600 JPY	29,700 JPY per month

*1 The fee may be reduced depending on the method of the selection process. For specific details, please check the guidelines for admission of the graduate school you wish to enter.

*2 Should tuition fees be revised during a student's period of enrollment, the new amount will become effective from that point on.

Tuition <https://www.kyoto-u.ac.jp/en/current/how-to/tuition>

Kyoto University International House

Kyoto University has accommodation facilities available for international students and researchers. Please check the details on the Kyoto University International Service Office website.

On the above website, you can also access information about visa requirements, obligations, and other related procedures in Japan.

English-Taught Undergraduate Program

Kyoto University offers an English-taught degree program for bachelor degree in the Undergraduate School of Global Engineering, the Faculty of Engineering.

Enrollment is in April. Please refer to the website for course details and application procedures.

Engineering

Undergraduate International Course Program of Civil Engineering

<https://www.s-g-e.t.kyoto-u.ac.jp/int/en>

Kyoto iUP

Kyoto University International Undergraduate Program

Kyoto iUP is a 4.5-year program comprising a six-month preparatory course followed by four years of undergraduate study. Japanese language proficiency is not required at the outset, as the program provides intensive Japanese language classes. Upon graduation, students are awarded a bachelor's degree in their selected major.

Kyoto iUP

<https://www.iup.kyoto-u.ac.jp/>

Double/Joint Degree Programs

Kyoto University offers a wide variety of double and joint degree programs in partnership with overseas institutions. Details are available by contacting the Kyoto University graduate schools running these programs.

<https://u.kyoto-u.jp/jddd>

English-Taught Degree Programs in Graduate Schools

For graduate programs, a variety of study areas are available in English. The types of degrees and application methods vary depending on each graduate school and major. For details, please refer to the websites of individual graduate schools. If you have any questions, please contact the relevant administration offices.

*The academic year begins in April or October. It depends on the department and the type of degree.

*In addition to the programs listed below, there may be opportunities in individual laboratories or with specific academic advisors to earn a degree in English, especially at the doctoral level.

Non-Degree Programs

Research Students

Research student is a non-degree seeking status which allows students to conduct research at a graduate school/research institute of their choice. Many students from abroad enroll as research students to prepare for the graduate program (master's/doctoral/professional degree) under faculty supervision. To qualify for this status, applicants must contact and obtain approval from their prospective supervisor.

Exchange Students

Kyoto University offers exchange programs accepting students from institutions with a university-level exchange agreement for one semester (6 months) or two semesters (12 months) in Kyoto. Application guides for both programs are sent out to partner institutions in June and December. Applications should be submitted to Kyoto University through the home institution's international office; direct applications from students will not be accepted.

<https://u.kyoto-u.jp/partners>

Short-Term International Students

Short-term international students is a status designed to enable international students to study at Kyoto University for a maximum of 3 months. International students enrolled in a non-Japanese university may apply for short-term special courses, such as Amgen Scholars Program, or for a laboratory/supervisor that can host them. Not all undergraduate faculties/graduate schools/research institutes take short-term international students. Applicants are therefore advised to contact the relevant faculty for details.

Kyoto University of Advanced Science

KUAS is an accredited private university which was founded in 1969 in Kyoto, Japan. In 2020, KUAS established the new Faculty of Engineering where students can learn about the most advanced technologies through a practical study program. At KUAS' Faculty of Engineering, students will be able to study a wide range of engineering fields and prepare themselves to compete on the global stage. KUAS will provide its students a professional and practical education to help them grow into leaders of innovation and ensure that they are capable of taking on the diverse challenges that society faces.

Find out more!

Rene Suarez

From Bolivia
Enrollment: September 2022
Master's Program

Hello! My name is Rene Suarez, and I am from Bolivia. I obtained a bachelor's degree in Mechatronics Engineering from the Military School of Engineering in my home country. Right after graduation, I traveled to Japan to start my master's studies here at KUAS.

Q. Why did you choose KUAS?

Many factors went into my choosing KUAS. First, the university facilities and equipment amazed me and made me think about all the things that I could create in them. In addition, many high-tier professors are working on very interesting research topics. Those research topics caught my attention and made me want to know more about them. Finally, I chose KUAS for all the support provided to the international students from the first day of the application process, as well as the convenience of the graduate program being completely in English.

Q. What are you studying/researching?

My research is mainly about the design of new and useful soft robots. Soft robots are robots that are primarily composed of soft materials such as silicone, fabric, and so forth. Right now, I am working on a soft gripper that can grasp a variety of objects of different sizes and only need compressed air as an actuation method. Similarly, I am making a foldable fabric arm that can be used for assistance in wheelchairs or similar devices.

Q. How do you like your life, activity and classes at KUAS?

I am truly enjoying my life at KUAS. Every day I learn something new, not only from the professors but also from the other members of my lab and other labs. In addition, there is always support and guidance in the projects I want to develop. There are also activities organized by the university for the students to learn more, enjoy the Japanese culture and meet local people. I enjoy participating in them when I have the opportunity. Classes are well-oriented and make me want to study deeply about the discussed topics.

Q. Any comments or advice for students that are thinking about studying abroad?

My advice for the students that are thinking about studying abroad is that they should take the step and apply for a university abroad if they have the opportunity. Studying in a different country is a completely new experience in which they will not only learn a lot about their interest topics but also about the culture of the country they are visiting. In addition, they will share experiences with people from all around the world, which will help them broaden their perspectives and see things in different ways. It is definitely an experience worth trying.

THE COLLEGE OF SUSTAINABILITY AND TOURISM

AT RITSUMEIKAN
ASIA PACIFIC UNIVERSITY

Scheduled to open in April 2023.
As the program is still under
development, all content is subject
to change. The name of the college
is also tentative.

Rooted in practical experience, research, and cross-disciplinary engagement, the **College of Sustainability and Tourism** produces graduates who are prepared to discover, promote, and protect the unique natural environment, culture, and historical heritage of places around the world. Pursuing this bachelor's degree means addressing critical questions about resource depletion, climate change, and regional revitalization through sustainability studies and tourism in a highly collaborative and globally diverse environment.

MISSION AND GOALS

We aim to foster a community of **scholar practitioners**—experienced and informed agents of change who draw on scholarly knowledge, innovative research, and practical field work to solve contemporary issues and global challenges in sustainable development and tourism. Our students will:

- Cope with the challenges of the future
- Act responsibly as global citizens
- Work collaboratively with people from different regions and countries
- Communicate clearly across cultural boundaries
- Cultivate basic and specialized knowledge in the field of sustainability and tourism, including:
 - Problem-solving skills
 - Critical thinking
 - Qualitative and quantitative analysis

WHAT SETS US APART

This is a **highly customizable** course of study, offering **nine different concentrations:**

- Environmental Studies
- Resource Management
- International Development
- Tourism Studies
- Tourism Industry Operations
- Hospitality Operation
- Regional Development
- Social Entrepreneurship
- Data Science & Information System

Off-campus programs

aren't just encouraged, they're required. They give our students the opportunity to live the concepts they learn in class through hands-on experiences through a field study, major internship, or practicum with potential partners like ANA InterContinental, Orix Hotels and Japanese National Parks and agriculture. Other potential partners include:

- UN World Tourism Organization (UNWTO)
- Food and Agriculture Organization of the United Nations (FAO)
- UN Development Programme (UNDP)
- The World Bank
- Oita Prefecture
- Kitakyushu City, Fukuoka Prefecture
- Japan Airlines (JAL)
- Kyushu Electric Power

AN APU EDUCATION

Earn a four-year bachelor's degree while **studying in English**
Learn **Japanese** intensively

Global Studies Major [GS]

College	College of International Relations	
Degree Awarded:	BA in International Relations	
Duration:	4 year full-time	
Enrollment:	April / September	
Yearly Intake:	100	
Location:	Kinugasa Campus, Kyoto	
Key words:	International Law, Peace and Conflict Studies, Security Studies, International Human Rights, The United Nations, Global Environmental Issues, Gender Issues, Race and Ethnicity, Global Media	

Community and Regional Policy Studies Major [CRPS]

College	College of Policy Science	
Degree Awarded:	BA in Policy Science	
Duration:	4 year full-time	
Enrollment:	September only	
Yearly Intake:	40	
Location:	Osaka Ibaraki Campus	
Key words:	Urban Planning for Sustainable Cities, Community Safety, Development Economics, Regional Development, Global Public Policies, Social Welfare Policies, Public Management, Constitutional Law	

Information Systems Science and Engineering Course [ISSE]

College	College of Information Science and Engineering	
Degree Awarded:	Bachelor of Engineering	
Duration:	4 year full-time	
Enrollment:	April only	
Yearly Intake:	50	
Location:	Osaka Ibaraki Campus *The College of Information Science and Engineering will be relocated from Shiga to Osaka in April 2024.	
Key words:	IoT, Business Intelligence, Data Science, Artificial Intelligence, Robot Technology, Human Interface, Affective Engineering, Digital Human, Virtual Reality, Advanced Computer Graphics	

Message for prospective students - Matheu from Brazil, Global Studies Major

Escolhi a Universidade Ritsumeikan por causa dos benefícios que ela traz para os alunos que vêm de outros países, e trará oportunidades para meu futuro. Benefícios tais como a bolsa ou suporte ao aluno. Além disso, você conhecerá uma nova cultura, criará novos laços de amizade e terá novas experiências divertidas. Ainda não explorei todo o Japão, só uma pequena parte e eu me diverti bastante. Diferente do Brasil, o Japão é seguro, limpo e respeitoso. Recomendando muito vir fazer faculdade aqui. Se você tiver interesse em estudar em outro país não tenha medo, pois você estaria perdendo muita coisa boa que irá ajudar na sua vida!!!

Shinshu University is a national university with 8 faculties and 5 graduate schools. We offer exciting courses and conduct cutting edge research across a broad range of academic disciplines on 5 campuses located throughout Nagano Prefecture.

@ShinshuUni

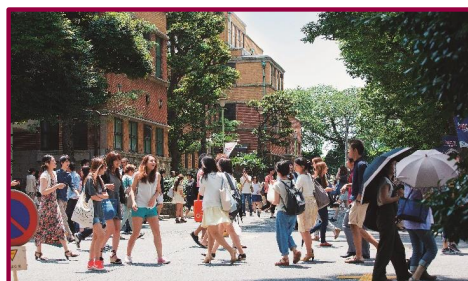

Well located in central Tokyo, **Sophia University** was founded by the Jesuits in 1913. Since then, it has been a pioneer in international education in Japan, attracting students from all over the world. In 1949 Sophia established the **first program in Japan taught entirely in English**, and it continues to lead the Japanese academic world in offering **undergraduate and graduate** programs bursting with diversity. If you are looking for **English-taught, high-quality education**, and want to enjoy a **global, unique and welcoming learning environment** in Japan, Sophia is the place for you!

When it comes to helping students with their finances and daily lives, Sophia offers a variety of **scholarships (all grants, no loans)**, including support of partial/full tuition. Sophia also provides different types of **dormitories and housing options**, aiming to support students who are starting their new life in Japan.

If you're interested in joining an extracurricular activity, a long list of **clubs and circles** is available for you to find the best option!

Other services, such as **counseling center, prayer room, nursery**, are easily accessible at Sophia's unified Yotsuya Campus. Check it out at Sophia's official website!

FGL

Future Global Leadership

for UNDERGRADUATE

The three undergraduate degree courses in **English** provide students with a solid foundation in their chosen area and exposure to cutting-edge research.

Admission October

Contact FGL Admissions Office, Tohoku University
tohoku-fgl@grp.tohoku.ac.jp

AMC

Advanced Molecular Chemistry

AMC offers a fundamental chemistry curriculum emphasizing materials science.

FIELD Chemistry, SCIENCE

Topics Covered

Organic Chemistry / Inorganic Chemistry
Physical Chemistry / Polymer Chemistry
Materials Chemistry / Biochemistry etc.

IMAC-U

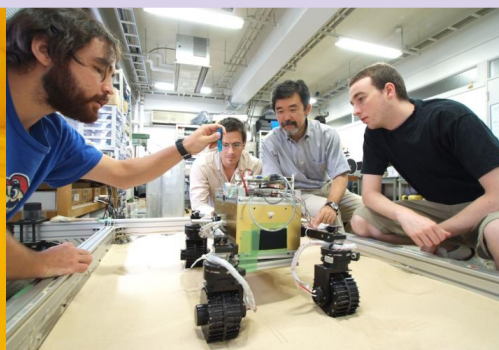

International Mechanical and Aerospace Engineering - Undergraduate

IMAC-U provides students a world-class research environment for studying mechanical engineering.

FIELD Mechanical and Aerospace Engineering, ENGINEERING

Topics Covered

Mechanical Systems Engineering / Nanomechanics
Bioengineering / Robotics / Aerospace Engineering
Quantum Science and Energy Engineering
Environment and Energy Engineering
Biomedical Engineering etc.

AMB

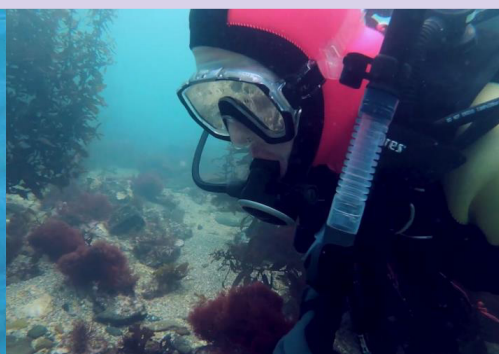

Applied Marine Biology

AMB emphasizes research applications for aquacultured marine animals and plants.

FIELD Applied Biosciences, AGRICULTURE

Topics Covered

Marine Ecology / Marine Biochemistry
Fish Genomics / Conservation Biology
Marine Biotechnology / Informatics etc.

Admission Steps

Please find the important dates and requirements for the application in "**Application Guide for 2024 October Enrollment**" on the FGL homepage.

Academic Requirements

- Official English Test Score TOEFL iBT® 79+ or IELTS Academic 6.0+
- Scores of Standardized Examinations (e.g., EJU, ACT, AP, GCE-A, IB, etc.) in Mathematics, Physics, and Chemistry

- * For AMB, Mathematics and two science subjects among Physics, Chemistry, and Biology
- * EJU scores will be accepted regardless of whether the exam was in English or Japanese.

Financial Aid

Students who achieved excellent scores on the entrance examination may be able to receive any of the scholarships below. Please check the application guide for details.

- *Japanese Government (MEXT) Scholarship* (University Recommendation)
- *Tohoku University President Fellowship* (the equivalent amount of exam, entrance, and tuition fees)
- *MEXT Honors Scholarship for Privately Financed International Students*

Housing

University dormitory will be reserved for the first and second years FGL students.

Furnished Private Room/
Common Area:
Dining-Kitchen,
Bathrooms, and
Laundry

Student Support

- Tutor System (Buddy)
- Student Learning Advisor System
- Student Counseling
- Extracurricular Activities, etc.

Looking forward to seeing you at TOHOKU UNIVERSITY!

Tokyo University of Foreign Studies (TUFS) celebrates 150 years as an institution specializing in the research and teaching of global languages and cultures. International students of TUFS will be joined by classmates studying their home languages and regions, making it a true Global campus beyond English.

Located in a quiet residential area in the western part of Tokyo, TUFS provides an excellent academic environment for international students. Start your exploration with one of the programs at TUFS offering English-speaker track examinations. Discover Japan comprehensively and foster your global literacy at the **School of Japan Studies (undergraduate)**. Explore the world through a multidisciplinary approach and formulate effective responses to issues of Peace and Conflict at the Master's program on **Peace and Conflict Studies**. Or make substantial contributions to international development including SDGs at the **Joint Doctoral Program for Sustainability Research**.

Admission fee: JPY 282,000
(amount as of June 2023)

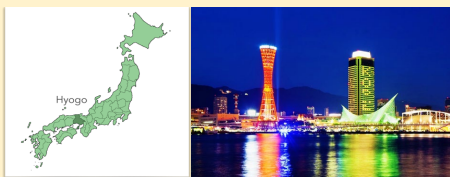

The University of Hyogo Prepares for You for Future Careers in the Global Arena

The University of Hyogo was established in 2004 by integrating 3 prefectural universities.

The oldest predecessor was Kobe University of Commerce, which was founded in 1929. Since its establishment, the University of Hyogo has graduated many outstanding students who are now working commendably in many fields, including economics, healthcare, academia, media, and government. By developing expertise in their respective fields, they have built highly successful careers and have become outstanding leaders.

We sincerely hope you to choose the Global Business Course, the GBC, and join us at the University of Hyogo, where intellectual insights and your future careers in the global arena can be fostered. The time you spend in the GBC will surely be fruitful.

Hyogo Prefecture is located in the geographical center of Japan, and is easily accessible to the world by sea and air.

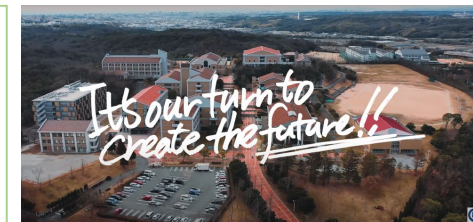

Kobe is the capital city of Hyogo Prefecture and was one of the first Japanese cities to open for trade with foreign countries.

The Kobe Campus for Commerce is located in western Kobe, in the special educational district of the city. The campus is the home of the Global Business Course as well as the School of Economics and Management.

(International Dormitory)

All GBC students are required to live in the on-campus, international dormitory, Global House, for their first year. Three or four students share the same unit, which includes a kitchen, living room, and bathroom. However, each student has his/her own bedroom where each person can enjoy privacy.

Global Business Course Bachelor's degree of Economics

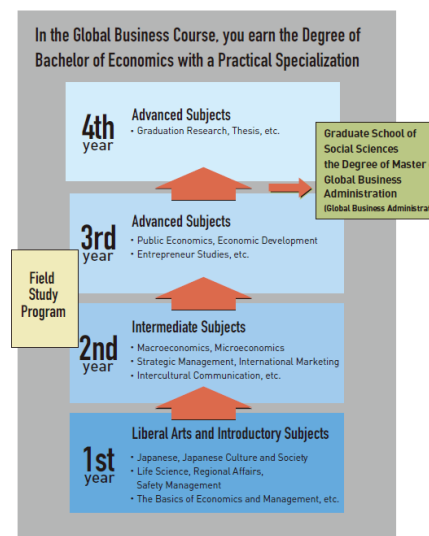

- Intake: 80 (30 International Students)
- All classes are taught in English
- Classes to learn Japanese as well as classes to experience Japan
- Internship Opportunities with Global firms

MEXT(Japanese Gov't) Scholarship / Special Admissions for Undergraduate Students

- Full 4-year scholarship
- 8 International GBC Students enrolling in September 2021~23

We are in the process of applying to the authorities to continue the MEXT scholarship after September 2024.

Student from Romania, enrolled in Global Business Course in 2019.

Studying at University of Hyogo has helped me gain a deeper understanding of cultural diversity and Japanese business and management, contributing to my growth as an independent student. But especially, I am very happy to say that I have met so many interesting and kind people who have I bonded with while living in the international dormitory. We watch movies and cook recipes from our countries, from Romania, Taiwan, Japan, while learning so many things about culture and customs. GBC is a program that not only provides me with information and academic resources but also with long-term relationships with people from different backgrounds and cultures. I believe there is so much beauty in diversity, and everyone should experience what GBC has to offer.

Key Facts

- Tuition Fees and Exemptions exclusively for International "Global Business Course" Students

* Fees are subject to change without notice

(JP Yen)

Year	Student Classification	Fee	Exemptions	Amount to be Paid
1st Year	All students	535,800	267,900	267,900
Each of 2nd-4th Years	Top 30% of Year	535,800	535,800	0
	Other students		267,900	267,900
Total for 4 Years	Always top 30% of Year	2,143,200	1,875,300	267,900
	Always other students		1,071,600	1,071,600

- Application and Admission Fees

* Fees are subject to change without notice

* Other extra expenses such as Education Enhancement Fee and Student Council Fee are required to pay.

(JP Yen)

Items	Student Classification	Fee	Exemptions	Amount to be Paid
Application Fee	All students	17,000	8,500	8,500
Admission Fee	All students	282,000	141,000	141,000

- Living Expenses

* Dormitory rent is subject to change without notice

(JP Yen)

		Amount per month
Rent	All 1st Year GBC students are required to live in the International Dormitory "Global House".	30,000-50,000 *Rent of "Global House" is 30,000
Other living expenses	e.g.meals, clothes, books	75,000 (Approximately)

- Other Possible Financial Aid

Japanese Government Scholarship (MEXT Scholarship)
Private and Public Scholarships offered by various organizations

The contents, details, and cost of the GBC are subject to change. Please check our website for the latest information.

After Graduation

GBC students come from a wide range of backgrounds. Upon graduation from the GBC, students will be prepared to pursue many different opportunities. The Career Center can assist students in finding paths that are right each of them.

GBC students have a chance to experience internships in major Japanese companies, whose headquarters are located in Hyogo Prefecture. Furthermore, there is a chance to enroll in the GBC Graduate School in order to further deepen their knowledge of economics and management.

Life at the University of Hyogo

Financial Aids/Exemptions/Scholarships

All international GBC students are granted a 50% reduction in tuition for 4 years. Also, from the second year until the 4th year, students with grades in the top 30% are exempted from paying tuition.

In addition, the University of Hyogo offers other forms of financial aid. Thanks to the generosity of donors, international GBC students are entitled to receive startup aid in their first year. Other scholarships include JASSO and private scholarships exclusively for international students.

Counseling

If students have any concerns about their physical, mental, or emotional health or well-being, there is a healthcare center on campus, where students have access to counseling in English on a regular basis.

Club Activities

There are variety of club activities at the Kobe Campus for Commerce. Students can participate in clubs such as soccer, Japanese archery, dance, or music, or they can start their own. Also, every year in autumn, the University Festival, Shodaisai, is held.

Global Business Course Admissions for International Students

Quota for students from overseas

30 per year

Application Eligibility

■ Requirement 1: Educational Qualifications

(1) Applicants MUST have completed, or are expected to complete, a 12-year standard education curriculum at an educational institution, equivalent to a Japanese 12-year official education curriculum.

*Note that those who attended Japanese junior and/or senior high school for up to three years in total are eligible to apply.

(2) Those who are acknowledged to have completed, or are expected to complete, a curriculum equivalent to 12 years of Japanese education.

■ Requirement 2: English Proficiency

Applicants MUST achieve score on a standardized English proficiency exam that is equivalent to the B2 level of the CEFR (Common European Framework of Reference for Languages) or higher.

(Please refer to the latest Application Guidelines.)

Screening Method

Students will be selected based on their application documents and an interview.

The interview will be conducted in English, either locally or through the Internet.

Applicants residing outside Japan do not need to come to Japan for the interview.

Screening Schedule

(Please refer to the latest Application Guidelines.)

OUR HIGHLIGHTS

University of Tsukuba

UNDERGRADUATE

GRADUATE

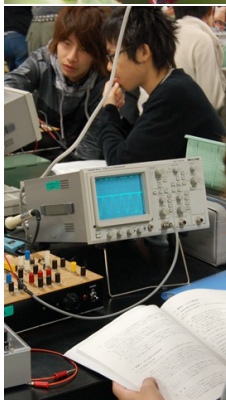

Life and Environmental Sciences

- Biological Sciences
- Agro-biological Resource Sciences
- Geoscience

Interdisciplinary Engineering

- Energy, Optics and Electronic
- Robotics and Mechanics
- Materials and Molecular Engineering
- Modeling and Simulations

International Social Sciences (TISS)

- Social Sciences
- International Issues (Sociology, Economics, Law, Political Science)

Global Issues

Interdisciplinary program focused on providing knowledge and techniques to tackle global challenges related to environmental issues and human rights.

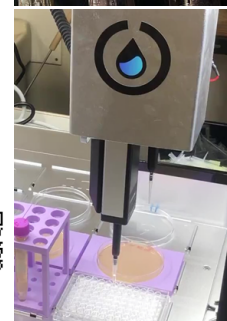

Heritage Studies Degree Program

The Heritage Studies program brings together research and knowledge from various fields related to heritage preservation.

Ph.D. Program in Humanics

Combined knowledge of biomedical sciences and physical sciences, engineering and/or informatics

Ph.D. Program in Empowerment Informatics

The program deals with a new branch of informatics that supplements and extends human functions and enables technology to work in harmony with people.

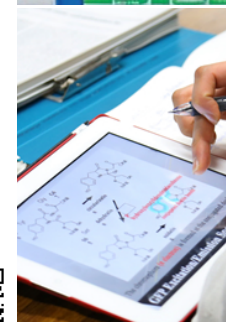

Tsukuba Life Science Innovation (T-LSI)

- Bioinformatics
- Biomolecular Engineering
- Disease Mechanism
- Drug Discovery
- Food Innovation
- Environmental Management

Ph.D. Program in Human Biology

The program aims to nurture future leaders who will bring together expertise in various fields relating to human biology to identify and work towards overcoming global issues.

TIAS Tsukuba International Academy for Sport Studies

- Olympic & Paralympic Education
- Sport Management (Sport, Business, Policy & Governance)
- Sport Science & Medicine
- Teaching, Coaching & Japanese Culture

Japan-Expert Program

Providing tools and knowledge from Japan for global human resources. Four programs available:

- Agricultural Science
- Healthcare
- Art and Design
- Japanese Language Teacher Training

How to Apply

Application Guidelines for International Students

Financial Support

Scholarships and waivers available to International Students

YNU values international students and the diversity they bring to our campus. We have years of experience in hosting enthusiastic international students and researchers. As a result, there is a range of languages, culture, religions, and values in YNU, as well as systems and environments in place to harness such diversity and enrich campus life for all.

Together with international students, YNU will continuously strive to be a vibrant educational hub with a diverse student body, and will continue to disseminate world-class educational and research achievements to create a better future.

YOKOHAMA Socrates Program

YNU Program for **SOC**ially Resilient And **sus**Tainable **Eco**Systems

In April 2024, the YOKOHAMA Socrates Program will be starting!

The new program will be centered around the issues and methodologies in the humanities and social sciences related to the twin themes of **social resilience** and **social sustainability**. It is a **bilingual global education program** in the YNU College of Urban Sciences enabling students to obtain a **bachelor's degree** with English and Japanese as common languages.

Socratic method

- Small classes in the fields of humanities and social sciences
- Discussion-based seminars

FLOW OF STUDIES

1st Year

You will learn a wide range of academic perspectives and insights through General Education Courses. You will also acquire basic skills for further study through Foundational Skills Courses.

2nd & 3rd Year

You will learn about issues relating to social resilience and sustainability from a wide range of Specialized Courses. You will also join two of four Workshops from the following themes: Social and Cultural Studies, History and Geography, Environmental Studies, and Policy Management and Development.

4th Year

You will work on your thesis based on your choices of specialization. Through thesis-related seminars, your main focus will be to complete your graduation thesis, the culmination of your four years of study.
